

This is our LA travel recommender system, it will answer various questions related to LA's restaurants and hotels.

It looks so cool. How do I use it?

You can just click the button and speak to it, and it will analyze your questions and return the relevant results.

Wow , let me try it.

Sure.

I want to eat Japanese noodles.

It will need a little time to proceed.

Here you are , the restaurants with Japanese noodles are shown here.

You can look through these restaurants by their rating or price, and you can click the tokens to see some reviews.

Yeah. I have a question, why udon/ramen is listed here. I don't think that it has tokens related to Japanese noodle.

Actually , if you click the Wikidata link. You can see here ,the udon is a subclass of Japanese noodle. Here the system did reasoning for us.

Wow that's amazing.

Also if you return back, you can click the url of restaurant, it will navigate you to the source page and you can order food in this restaurant,

Ok, I got it How about hotel.?

You can do is in same way.

Let me try: hotel. With coffee shop

Aha, this results are shown here . And if you click the url , you can make your own ordering

Great. So kg plays a big role here , right

Yeah , maybe I can show our kg
